DR KARL KRUSZELNICKI

Karl Kruszelnicki used to be a "proper pukka scientist, engineer and doctor", but is currently an author and science commentator on radio and television.

Away from the media, he has worked as a physicist; labourer; roadie for bands (including Bo Diddley); car mechanic; filmmaker; hospital scientific officer; biomedical engineer (when he designed and built a machine to pick up electrical signals from the human retina); TV weatherman and medical doctor at The Kids Hospital in Sydney.

In addition to his degrees in Physics and Mathematics, Biomedical Engineering, and Medicine and Surgery, he has studied several non-degree years at various universities in Astrophysics, Computer Science and Philosophy. He speaks at primary, secondary and tertiary institutions, and is an after-dinner speaker, and corporate video writer and presenter.

Karl is an answer in search of a few thousand questions.

In the media, he was a writer and presenter for the first series of Quantum, and has been a science reporter on TV ever since (The Midday Show, Good Morning Australia, and is currently a regular on Channel 7's Sunrise).

Once a week for a magic hour, Karl is Live on Air on Triple J. It's an hour devoted to the collective exploration of some of the great mysteries of life, such as "why does the water in the shower slow down just when it gets hot?" This show attracts up to 300,000 people (about 1.5% of the Australian population) and sometimes "crashes" the switchboard, when the number of incoming calls reaches 7,000 per 15-minute window.

Karl has written 25 books on the amazing world of science; delving into questions such as 'Can fidgeting help you lose weight?' and 'Do your ears really grow bigger as you get older?'. His latest is entitled 'Dis Information and other Wikkid Myths'.

CLIENT COMMENTS

"Dr. Karl was very engaging and most people found him brilliant."

Justice Department

"Excellent. Extremely entertaining – you don't get a chance to finish laughing from the first joke, when the second comes along."

Queensland Health
