DR KEITH SUTER ON CLIMATE CHANGE

Currently a hot topic, Dr Suter's presentations around climate change are built on three main areas:

1. An explanation of the background to the controversy (he is a member of The Club of the Rome, which was one of the first organisations to raise concern about environmental issues)
2. An assessment of the global risks and opportunities presented by climate change
3. An examination of the options facing Australia (including the business opportunities).

While he agrees that this is a very serious crisis, he does not believe that all is lost and that, on the contrary, it is possible – with enough political and business leadership – to avert disaster.

“Well researched re the issues facing Qld population expansion and a good understanding of the related health issues that came with that. Was very entertaining in his presentation and very engaging as a speaker. Provided good summary notes for his presentation well in advance - no need to chase up any presentations, and he personally followed up progress regards his role in our Forum. Very generous with his time in that he was prepared to stay for the day and to talk generally with the delegates, and undertook a radio interview on the topic of his presentation”

Keith was simply brilliant! His grasp of the subject and his presentation were both spot on, I would highly recommend him for almost any function that had managerial type of cliental A very knowledgeable man who spoke to us, not down to us, he read the audience very well. He has a warm easy going manner, which is very pleasing at a conference of this nature.

Caltex Australia

“Dr Keith Suter wrote and delivered a presentation specific to our conference theme and message. This is amazing – to have a keynote speaker who firstly (really does!) tailor his presentation and then goes on to offer the delegates written information for use in their work and life. His message was clear; his anecdotes - highly amusing; and his passion for man, the environment and the hard social issues - intense.”
